Professional Series DN-1 Operating Instructions

1. Install the 9v rechargeable battery when ready to use. Do not leave the rechargeable battery installed in unit unless the base is plugged into 115vac.
2. If this unit has not been under use for some time, then install the rechargeable battery and place the DN1 in the base unit with the base unit plugged into 115vac. Leave on the base unit under 115v power at all times. Recharging will take overnight to fully charge battery.
3. After the battery is fully charged, the ready light will come on. Unit is now ready to test Diamonds, Moissanites and Metal Detection. If the metal light comes on, stop testing until the ready light comes back on. Be careful not to touch the probe tip to any metal surrounding the stone.
4. If the unit has been removed from the base for about 6 minutes, the alarm buzzer will come on. To reset, place unit back into the base or press the alarm reset button.

Warranty

Oris Nelson Enterprise, Inc. provides that each DN 1 Pro will be free from defects in material and workmanship for a period of two years from the date of purchase. (Batteries and Probe Tip are not included in Warranty.) This warranty becomes void by:

1. Unauthorized repair, misuse, modification, alteration or tampering.
2. Accidental damage, neglect or improper use.

Oris Nelson Enterprise, Inc. shall not be held legally liable or responsible for any error in display indication or the interpretation thereof in the identification of any stones, minerals, gems or gemstones by the DN 1 Pro.
